PROFESSIONAL SUMMARY

Results-driven professional with 6+ years of full-time experience spanning enterprise networking, IT operations, and full-stack web development across Pakistan, Canada, and the United Kingdom, plus early part-time IT experience gained during undergraduate studies in the UK. Skilled in designing secure network architectures, leading incident response for 200+ resolved cases, and delivering scalable, user-focused applications with React, Node.js, and Tailwind CSS. Combines a strong networking and systems background with modern development practices to support both infrastructure and product delivery.

WORK EXPERIENCE

Full Stack Developer & Network Administrator

Feb 2024 — Present

Afaq Technologies · Lahore, Pakistan

- Architected and engineered responsive, high-performance web applications using React, Node.js, Tailwind CSS, and JavaScript/JSX.
- Spearheaded development of a full-stack Point-of-Sale (POS) system, focusing on an efficient frontend and user-friendly interface to streamline transactions.
- Designed and implemented features for a robust Event Management platform, ensuring clean code architecture and seamless cross-device responsiveness.
- Managed network infrastructure, including routers, switches, wireless access points, VPNs, and firewall rules to ensure secure, reliable connectivity.
- Conducted Wi-Fi site surveys and migrated email and file systems to Microsoft 365 and cloud platforms, enhancing efficiency and data security.

Technical Sales Support Engineer

Dec 2023 — Feb 2024

DMG Inc · Toronto, Ontario, Canada (Contract)

- Supported clients with tailored IT solutions, boosting customer satisfaction by 30%.
- Conducted network needs assessments and recommended upgrades to optimise performance.
- Delivered technical demonstrations and assisted in proposals for IT infrastructure solutions.

Freelance IT Projects

Jan 2020 — Dec 2023

Self-employed · Remote

- Configured routers, switches, and wireless access points for small business and residential clients.
- Developed custom websites and mobile applications tailored to specific business needs, including solutions for property management and construction firms.
- Set up secure VPN connections and firewall rules for remote access, and migrated email and file systems to Microsoft 365 and cloud platforms.

Networking Maintenance & Repair Engineer (Part-Time)

May 2019 — Oct 2020

Hubble Telecom UK Limited · London, United Kingdom · Alongside undergraduate studies

- Diagnosed and resolved 200+ business network issues with a 95% resolution rate.
- Configured routers, switches, and firewalls to improve stability and security.
- Implemented infrastructure upgrades that increased uptime by 18%, while ensuring secure and compliant access control for corporate clients.

Information Technology Analyst (Part-Time)

Oct 2018 — Apr 2019

K.S.C. IT Limited · London, United Kingdom · Alongside undergraduate studies

- Provided IT support to 50+ end-users weekly, covering hardware, software, and network issues.
- Reduced ticket resolution time by 40% by introducing a structured triage system.
- Installed and configured network devices and trained staff on new technologies to improve productivity.

EDUCATION

Master of Engineering

Wireless Communications & Computer Networking

Illinois Institute of Technology · Chicago, USA

Graduate study focused on wireless network design, secure communications, and advanced networking protocols.

Bachelor of Engineering (Hons)

Telecommunications & Network Engineering

University of Bedfordshire · Luton, United Kingdom

Undergraduate study covering network engineering fundamentals, telecommunications systems, and applied electronics.

SKILLS & TECHNOLOGIES

Networking: TCP/IP · DNS · DHCP · VLANs · Router & Switch Configuration · VPN · Firewall Policies · LAN/WAN · Wireless Deployment

Systems & Security: Windows Server · Active Directory · Microsoft 365 (Exchange, Teams) · SIEM · Incident Response · Patch Management · Endpoint Protection

Full Stack Development: React · JavaScript · HTML/CSS · JSX · Node.js · Tailwind CSS · Vite · Python · IoT (Arduino / Raspberry Pi) · Computer Vision · OpenCV · shadcn/ui

Tools & Platforms: Wireshark · VMware · VirtualBox · Git · AnyDesk · TeamViewer · RDP · Android Studio · Bluetooth BLE · Vercel · Recharts · Group Policy

PROJECTS

Point-of-Sale (POS) System

Full-featured POS system built at Afaq Technologies for managing sales transactions, billing, and inventory tracking, with a SQL-backed database for persistent, reliable record-keeping. (React/JSX · Node.js · SQL)

Pulse Check — Hospital Monitoring

Bedside hospital monitoring system tracking and visualising patient vitals in real time via a clinical dashboard. (React · JavaScript · Healthcare Dashboard)

IoT Automation & Security Platform

Secure web-based IoT system for remote control of electrical components with role-based access control. (Arduino · Raspberry Pi · Web Dashboard · IoT)

COVID-19 Contact Tracing App

Android app using Bluetooth beacon technology for proximity detection and exposure tracking. (Android · Bluetooth BLE · Java · Beacon Technology)

Driver Monitoring System

Real-time driver distraction detection using computer vision, with live alerts for drowsiness. (Raspberry Pi · NVIDIA Jetson Nano · Python · OpenCV)

KEY HIGHLIGHTS

6+ Years Experience | 3 Countries Worked | 200+ Incidents Resolved | 5 Major Projects | English (Fluent) | Urdu (Native)
