PROFESSIONAL SUMMARY

Results-driven professional with 5+ years of experience spanning enterprise networking, IT operations, and full-stack web development across Pakistan, Canada, and the United Kingdom, plus early part-time/internship experience gained during undergraduate studies in the UK. Skilled in designing secure network architectures, leading incident response for 200+ resolved cases, and delivering scalable, user-focused applications with React, Node.js, and Tailwind CSS. Combines a strong networking and systems background with modern development practices to support both infrastructure and product delivery.

WORK EXPERIENCE

Computer Networking Analyst

Feb 2026 — Present

Afaq Technologies • Lahore, Pakistan

- Design and maintain secure network infrastructure for enterprise clients, including firewall policies, access controls, and monitoring solutions.
- Configure routers, switches, VLANs, and VPNs to deliver reliable, high-performance, and secure connectivity.
- Lead escalated technical support and end-to-end incident resolution, minimising downtime for business-critical systems.

Junior Frontend Developer

Feb 2026 — Present

Afaq Technologies • Lahore, Pakistan

- Build full-stack web applications and internal tools using React, Node.js, and Tailwind CSS.
- Develop responsive, accessible UI components and integrate RESTful APIs for client-facing products.
- Partner with cross-functional teams on system integration, CI/CD deployment pipelines, and Agile ceremonies, including code reviews and technical documentation.

Production IT Analyst

Feb 2024 — Aug 2025

FGF Brands • Canada

- Delivered 1st- and 2nd-level support for production-floor systems, ensuring uninterrupted manufacturing operations.
- Resolved 90%+ of incidents quickly and efficiently using structured troubleshooting and root-cause analysis.
- Proactively monitored system health, network connectivity, and application performance to prevent outages.
- Conducted regular compliance audits and maintained a technical knowledge base for the support team.

Account Executive — IT Solutions

Dec 2023 — Feb 2024

DMG Inc • Canada

- Served as technical liaison between business clients and internal IT teams, translating requirements into actionable plans.
- Analysed client infrastructure needs and recommended tailored networking solutions.
- Supported the preparation of technical proposals and deployment plans for prospective clients.

Freelance IT Support & Network Engineer

2020 — 2023

Self-employed • Remote / Pakistan

- Designed, installed, and supported wired and wireless networks for small and medium-sized businesses.
- Configured routers, switches, firewalls, and VPN solutions to enable secure remote access.
- Migrated client email and business data to Microsoft 365 cloud platforms with minimal disruption.

Networking Maintenance & Repair Engineer (Part-Time)

May 2019 — Oct 2020

IT Firm • United Kingdom • Alongside undergraduate studies

- Diagnosed and resolved 200+ network incidents across multiple business sites.
- Installed and configured LAN/WAN components, including routers, switches, and firewalls.
- Conducted cabling inspections and network redesigns to minimise downtime and improve reliability.

IT Technician (Part-Time)

Oct 2018 — Apr 2019

IT Support Company · United Kingdom · Alongside undergraduate studies

- Delivered desktop and network support to 50+ end-users across the organisation.
- Introduced a ticket prioritisation system that reduced average resolution time by 40%.
- Assisted with software deployments, system updates, and routine data backups.

EDUCATION

Master of Engineering

Wireless Communications & Computer Networking

Illinois Institute of Technology · Chicago, USA

Graduate study focused on wireless network design, secure communications, and advanced networking protocols.

Bachelor of Engineering (Hons)

Telecommunications & Network Engineering

University of Bedfordshire · Luton, United Kingdom

Undergraduate study covering network engineering fundamentals, telecommunications systems, and applied electronics.

SKILLS & TECHNOLOGIES

Networking: TCP/IP · DNS · DHCP · VLANs · Router & Switch Configuration · VPN · Firewall Policies · LAN/WAN · Wireless Deployment

Systems & Security: Windows Server · Active Directory · Microsoft 365 (Exchange, Teams) · SIEM · Incident Response · Patch Management · Endpoint Protection

Full Stack Development: React · JavaScript · HTML/CSS · JSX · Node.js · Tailwind CSS · Vite · Python · IoT (Arduino / Raspberry Pi) · Computer Vision · OpenCV · shadcn/ui

Tools & Platforms: Wireshark · VMware · VirtualBox · Git · AnyDesk · TeamViewer · RDP · Android Studio · Bluetooth BLE · Vercel · Recharts · Group Policy

PROJECTS

Point-of-Sale (POS) System

Full-featured POS system built at Afaq Technologies for managing sales transactions, billing, and inventory tracking, with a SQL-backed database for persistent, reliable record-keeping. (React/JSX · Node.js · SQL)

Pulse Check — Hospital Monitoring

Bedside hospital monitoring system tracking and visualising patient vitals in real time via a clinical dashboard. (React · JavaScript · Healthcare Dashboard)

IoT Automation & Security Platform

Secure web-based IoT system for remote control of electrical components with role-based access control. (Arduino · Raspberry Pi · Web Dashboard · IoT)

COVID-19 Contact Tracing App

Android app using Bluetooth beacon technology for proximity detection and exposure tracking. (Android · Bluetooth BLE · Java · Beacon Technology)

Driver Monitoring System

Real-time driver distraction detection using computer vision, with live alerts for drowsiness. (Raspberry Pi · NVIDIA Jetson Nano · Python · OpenCV)

KEY HIGHLIGHTS

5+ Years Experience | 3 Countries Worked | 200+ Incidents Resolved | 5 Major Projects | English (Fluent) | Urdu (Native)
